Hiring Manager

T&M Associates

Middletown NJ

Dear Sir/Madam:

Please accept this letter and the attached resume as an indication of my sincere interest in the open, Junior Full-Stack Developer, position at T&M Associates. I am a back-end Engineer, who graduated from Rutgers University Coding Bootcamp. I am pursuing a full time permanent position with an organizations like T&M Associates.

My passion for computers started at a very young age. As I question the beginning to end process, I slowly began my journey to learn computer sciences. My first problem, although a little embraces to mention, was how to type “@” to be able to use my email account. After finding the right combination of keys, I was astonished and eager to learn more. That same enthusiastic continues today as I continue to hone my current skills while learning new ones.

I currently work as a Teacher Assistant, at Rutgers University. Where I help with the students education by using different teaching techniques. For example: live coding, debugging, answering question, sharing FAQ with the class and one on one/group tutoring. Most recently, I've helped updating the curriculum's activities and homeworkers base on: bugs, deprecate code, as well as students feedback. This position is very rewarding since I am able to have a positive impact on the students education.

In addition to my work as a Teacher Assistant, I also work at Express as an Assistant Manager. Where I drive the stores business by directly impacting the most fundamental part of our business, talent. I personally hire, develop and train new and current associates, to be the next customer services leads. This is where I've learned most of my soft skills: active listening, time management, self motivated, teamwork, leadership, analysis and execution.

I am very interested and willing to learn. In fact, that is one of the ways I keep myself motivated. My strong avocation of software architecture and development best practices, allow me to drive end to end deliverables. Merge with my experiences designing and developing responsive and elegant web applications using new technologies will prove that I am a candidate worthy of becoming a sidekick.

I am confident that my background and knowledge in the Information Technology arena along with my strong desire to further my own development of my skills and knowledge will prove an asset and add immediate value to your organization. Thank you for your time and consideration.

Sincerely,

Hector Candelaria
